Year 6

Experience: We will be completing some awesome 'street art' inspired designs!

Writing:

Linking to our Geography and Art units, the children will be writing a balanced argument. The topic will be based on the question: Is graffiti vandalism or art?
We will also write a narrative based on the novel and film 'Coraline'.

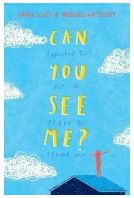

Topic:

Totally Urban: North America

Reading:

Our book this half term is Can You See Me? by Libby Scott and Rebecca Westcott. This is a fantastic story about a girl with autism who has spent her life trying to hide, but is now finally coming into the light.

Geography:

Year 6 will continue researching the key features of New York and how it has developed over the last several centuries, with a specific focus on urbanisation.

Computing:

We will be working on our own Text Adventure! We will have a go at playing then creating a game with multiple choices for our player based on a text of our choice. Our player's choices will determine the path they follow through the game and the outcome for the main characters.

RE:

In RE, the lessons will continue to be around Islamic rituals and key traditions. Then in the build up to Easter, we will move onto the Christian resurrection story.

French:

We will be planning a trip to France. We will research the climate. Decide what to pack and explore travel options.

Maths:

At the beginning of Spring 2, we will be beginning our revision phase of the year focusing on a range of topics: fractions, decimals, graphs, charts, averages, word problems, time and handling money.

Reasoning and problem solving will be a major focus as we look to apply all our mathematical knowledge in contextualised multi-step problems.

Arithmetic will remain consistent throughout Spring as part of the SATs preparation.

Art + Design Technology:

In Art, children will finish their topic of Graffiti, producing our final piece and exploring it with families in our Open Classroom.
DT will involve designing and building our own fairground rides!

PE:

Basketball – Game rules, dribbling, passing and shooting.

Fitness – Body movement, exercise program design, multi-skills and benefits of fitness.

Music:
In Music, we will explore the topic 'Short Ride in a Fast Machine'. This is a piece of minimalist music; we will be exploring the features and creating our own interpretation.
