Year 3

Experience: We will have lots of opportunities for some hands on learning this half term, both inside and outside the classroom.

We will also be getting ready for our Christmas production!

English:

We are learning how to write persuasive brochures this half term, drawing on the fun and memorable experiences we had at Butser Farm, which we visited last half term. Later on, we will be using drama and lots of collaborative learning to produce our own persuasive brochures about our own iron age villages. Towards the end of half term we will be getting into the festive spirit by producing some writing inspired by our favourite Christmas adverts!

Topic:

Animals, Skeletons and Movement

Maths:

We are continuing to develop our understanding of multiplication and division, with a focus on learning our times tables with increasing fluency. Our focus will be the three times tables up until Christmas.

Science:

We are learning about animals, skeletons and movement. We use technology to explore 3D models of the human body. We also learn the names of the bones of the body through song! We will play games to sort animals based on their diets and will draw conclusions about animals based on their skeletons.

Geography:

In Geography, we are learning about early settlements and human geography. We will be locating different Stone Age settlements on maps and we will learn about the physical and human features of each location.

Design Technology:

In DT, we are drawing inspiration from our previous Stone Age topic to make a pair of stone age trousers. We will be practising different sewing techniques, including a running stitch. We will then evaluate our final product.

Computing: We will continue to explore coding and algorithms using Scratch, which the children use to create a moving car which they can instruct to travel on a road.

PE: We will be developing our yoga skills, using a range of movements to create our own yoga flows. We will also be developing our hockey skills, learning to dribble, pass and eventually play small games.

RE:

We will be learning about Angels in RE, which ties in nicely with our Christmas celebrations.

French:

We will continue to learn about adjectives for colours colours, shape and size.

Music:

We will be celebrating learning at Anstey by learning and performing a rap song! We will also be using body percussion and a range of musical instruments to explore samba rhythms!
